Meeting the Information Needs of Winnipeg's Nurses

From the Editor

Ethics informs what is nursing, as with all health care professions. Like those professions, nurses face unique ethical situations particular to their profession. In honour of Nursing Week (May 10-14, 2010) we celebrate you in this issue of Info-RN with the theme of Nursing Ethics. For those who are 'do it yourself', we help you get started providing a search approach in PubMed on the topic of Nursing Ethics. For something more 'ready at hand' we have provided a webliography as well as book, website, video sections throughout this issue. We at the various hospital libraries are "out and about" during Nursing Week. Find out how your hospital library is showing its support. On the "technical" side we are highlighting our House Calls service and the University of Manitoba Libraries' new tool, the One Stop Search. A compilation of patient resources on Celiac Disease is on offer, acknowledging the upcoming national conference hosted in Winnipeg in June by the Canadian Celiac Association.

Finally, we are saying a warm hello and goodbye this month. We welcome Sherri Vokey, the new Health Sciences Centre librarian, located at the Neil John Maclean Health Sciences Library. We wave goodbye with best wishes in our hearts for Analyn Cohen-Baker, Librarian at Seven Oaks Hospital who retired April 30, 2010. We will miss her! At the helm until a new librarian can be found, we welcome Janet Rothney to the hospital librarian team.

National Nursing Week
May 5, 2010 2:11 PM
May 10 - 16 is National Nursing Week. Check out what your library will be doing to celebrate.
One Stop Search: Easily Discover the World of Library Content
Ever wished you could search for books AND journal articles at the same time? Now you can by using the University of Manitoba Libraries’ One Stop Search!

Finding Nursing Ethics Information In PubMed
Tips on finding nursing ethics information using PubMed.

Nursing Ethics Webliography
The following is a selected list of resources available from the UM Libraries on the topic of Nursing Ethics.

Farewell and Welcome to Health Sciences Library Staff
Join us in welcoming Sherri Vokey the new HSC Librarian and saying farewell to Analyn Cohen-Baker, the SOGH Librarian.

University of Manitoba Libraries
The Health Sciences Libraries support the teaching, research, and patient care activities of the staff and students of the Faculties of Dentistry, Medicine, and the Schools of Dental Hygiene and Medical Rehabilitation.

The Elizabeth Dafoe Library supports the research, study, and teaching requirements of the staff and students of the Faculty of Nursing. Other faculties served by the Elizabeth Dafoe Library include the Faculties of Art, Education, Human Ecology, Physical Education and Recreational Studies, and Social Work.

Working with the Winnipeg Regional Health Authority, the University of Manitoba provides library services to Winnipeg hospitals and longterm care centres. The Health Sciences Libraries now include the Neil John Maclean Health Sciences Library (Health Sciences Centre), and the libraries of Concordia, Grace, Seven Oaks, St. Boniface, Victoria, Deer Lodge Centre, Misercordia Health Centre and the virtual library at Riverview Health Centre.

The Health Sciences Libraries and the Elizabeth Dafoe Library offer a wide range of services — including document delivery, literature searches, and training — and provide access to an extensive collection of monographs, journals, videos, and health databases.

Publication Information
Info-RN is an electronic newsletter of the University of Manitoba Libraries dedicated to informing nurses in Winnipeg of services or resources that will help them access quality health information. Info-RN is published three times a year by the University of Manitoba Health Sciences Libraries. Comments, questions, or letters to the editor should be addressed to: nim_ref@umanitoba.ca

Editor: Melissa Raynard, Concordia Hospital Library
Regular Contributors: Lisa Demczuk, Christine Shaw-Daigle, Lori Giles-Smith, Angela Osterreicher, Lesley Mackie, Andrea Szwajcer, Sherri Vokey, Janet Rothney

National Nursing Week

This year National Nursing Week is May 10 – 16. It is an opportunity to celebrate Canadian nurses for their provision of outstanding patient-centred care and dedication to advancing the health system. This year’s theme – Nursing: You Can’t Live Without It! – reflects the immense value of Canada’s largest group of health-care providers.¹

Many of the Health Sciences Libraries are showing their support this year in various ways. Check below to see what your library is doing.

The **Bill Larson Library** (Grace Hospital) will have a display located outside the cafeteria on May 12 and 13. The display will highlight library resources for nurses and there will be a prize draw.

The **Carolyn-Sifton Helene Fuld Library** (St. Boniface Hospital) will have a display located in the Artrium as part of the Nursing Knowlege Café.

The **J.W. Crane Memorial Library** (Deer Lodge Centre) will have a booth located in “Main Street”. Nurses are encouraged to stop by and receive a surprise gift.

The **Victoria Hospital Library** has a display outside the cafeteria showcasing nursing resources you can’t live without! The VH Library is also inviting nurses down to the library one day for cookies! Contact the library (vghlib@umanitoba.ca) to find out which day!

The **Concordia Hospital Library** will have a library display in the hospital lobby during lunch hour each day of nursing week. Come check out the library resources reflecting the “program of the day” and enter our prize draw!

The **Seven Oaks General Hospital Library** will have a table set up for 4 days during the lunch hour, displaying books, journals and a couple of articles relating to the theme of the day.

The **Riverview Health Centre Library** will have a display on library services with books and handouts, Tuesday May 11 and Thursday May 13 in the Thomas Sill Reading Room.

Concordia Hospital*
One Stop Search: Easily Discover the World of Library Content

Ever wished you could search for books AND journal articles at the same time? Now you can by using the University of Manitoba Libraries’ **One Stop Search**!

**One Stop Search** not only searches the UM Libraries’ catalogue for available books, e-books, audiovisual material and journals, it also searches most of the Libraries’ online full-text journal subscriptions and many of our databases – all at the same time.

Some cool features of **One Stop Search** include:

- Google-like search interface.
- If you spell something incorrectly it will ask “Did you mean”, and provide you with an alternate spelling which you can click on to run the new search.
- You can limit your results to books or peer-reviewed articles.
- You can limit your results using subject terms.
- You can save items to a folder, which you can then export into RefWorks or Zotero.
- And the most important difference, you can access/request the books and articles found in One Stop Search using your library ID and password.

Be warned! The number of search results can number from zero to tens of thousands!

**Using One Stop Search**

**Searching for items**
As stated above, using **One Stop Search** is simple to use.

1. Go to the University of Manitoba Libraries main page for the **One Stop Search** box.
2. Type your terms into the search box and click on the **Go** button.
3. One Stop Search will find books and articles that contain your search terms. Items with terms in the title will be shown first.

Accessing the items
Each item found is identified with an icon. Books, eBooks, journal articles, video, etc. Items that are available online are identified with a starburst.

You can hover over the title of an item, or click on the magnifying glass for the Preview. For books the Preview pop-up will allow you to see the subject headings of a book and for journal articles you can read the abstract.
Click on the title of a book and One Stop Search will open a new window and link you to the library record. From there it will tell you which library has the book and as always, you can request/put a hold on the book.

Click on the title of an eBook and One Stop Search will take you directly to the online book.

Click on an article title, and it's exactly like clicking on the Get it @ UML button. The Get it @ UML screen will open in a new window and provide the link to online access if it is available.

Limiting search results
Your searches may end up with tens of thousands search results. Use check boxes offered in the different sections of the left hand side menu to help narrow your search.

1. Refine Your Search: Reduce your search results by only viewing items available online, articles from scholarly publications, or exclude newspaper articles.

2. Content Type: Limit your results list to show only journal articles or only books OR to include only articles, books and trade publication articles. Just check the boxes that apply! Click on the more options link to view more content types.

3. Subject Terms: Limit your results by selecting one or more subject terms. Click on the more options link to view more subject terms.
4. Publication Date: Adjust the arrows on the time scale or use the drop down menus to limit your results by publication year.

5. Library: You can even limit your results by items found in a specific library. Once again, click on the more options link to select more libraries.

6. Language: Select which languages you prefer in your reading material.

Exporting to RefWorks
Do you use RefWorks to manage your references? One Stop Search can export results to RefWorks.

1. Click on the folder icon to save item records to your Saved Items folder.
2. Click on the Saved Items link located at the bottom of the screen. A Saved Items window will pop-up.

3. From here you can print, email or export your records. To export to RefWorks, click on the RefWorks button. RefWorks will open in a new window. Log-in and One Stop Search will complete the export.

You can also export items to Zotero. Please check out this YouTube video *Using Summon and Zotero* for instructions.
Advanced Search

One Stop Search also has an advanced search option. You can search for a title, an author, a specific publication or combine all three options into one search. You can apply limits before the search is run by specifying a publication date range, a format type or online items only. Below is a picture of the advanced search screen.

Please note that at this time One Stop Search does not include CINAHL or PubMed. This is a great tool for a quick search to see what is out there on a given topic. However, your research should not be limited to this tool if you are conducting an in-depth research project.

A PERSONAL OBSERVATION: I find One Stop Search to be an excellent resource when I have a multidisciplinary search or when I need to find a specific journal article. To find a specific article I just type the title of the article into the search box and click on the Search Library button. If the article is available online through the U of M, it normally shows in the top results. I find this to be a huge time saver.

Melissa Raynard, Librarian
Concordia Hospital
Finding Nursing Ethics Information In PubMed

PubMed
PubMed comprises more than 19 million citations for biomedical literature from the MEDLINE database, life science journals, and online books. PubMed citations and abstracts include the fields of medicine, nursing, dentistry, veterinary medicine, the health care system, and preclinical sciences. PubMed is a free resource that is developed and maintained by the National Center for Biotechnology Information at the U.S. National Library of Medicine.

Access to PubMed is freely available at www.pubmed.gov. The University of Manitoba Libraries (UML) also provides an access point on the University of Manitoba Health Sciences Libraries website. Searching PubMed via the UML provides access to the linked full-text articles and UML article request form.

PubMed is listed under Health databases. To access:
1. Click on the PubMed / MEDLINE heading.
2. Click on the yellow “U Manitoba & Hosp. Libraries” button.

Finding Nursing Ethics Articles

Option 1: Basic Search
The basic search in PubMed is similar to a Google search. Enter relevant keywords for a quick, simple search.

Steps:
1. Type nursing ethics and other search terms into the search box. eg. nursing ethics dying; nursing ethics education
2. Click on the Search button. PubMed will retrieve all records in which your terms appear anywhere in the item record (eg. title, abstract, author, subject headings).

Option 2: PubMed MeSH Search
MeSH (Medical Subject Headings) terms are descriptive terms that medical librarians have attached to the articles indexed in PubMed. These heading describe the subject content of the articles.

Steps:
1. Select MeSH from the pull-down Search menu above the search box.
2. Type nursing ethics into the search box and click Search.
3. The subject heading retrieved is *Ethics, Nursing*. To search on the heading first click the check box beside the subject heading and then select “Search box with AND” from the Send To: pull-down menu. Select the box beside Restrict Search to Major Topic headings only if you wish to limit your search results to articles that have *Ethics, Nursing* as their major focus.

4. Click on the **Search PubMed** button. This will search the entire PubMed database for the MeSH term *Ethics, Nursing*. 

"Ethics, Nursing"[Mesh]

Search PubMed  Clear
Ways to narrow your results

1. Limit your search.
Click on Limits in the grey bar at the top of the page. Select appropriate limits for your search such as publication years, language, article type or journal group. (PubMed has a Nursing journals group which can assist in quickly limiting your search to the nursing literature). Click Search to run your search again with the limits in place.

2. Add key words to your MeSH term search.
In the PubMed search box, enter "dying OR palliative OR "end of life"" and click Search. Using "OR" will search for all the terms entered. Putting quotes around "end of life" will have it searched as a phrase.

3. Combine Searches
Click on Advanced Search in the grey bar at the top of the page. Here you will see your search history with each search statement given a number. Combine searches using AND between the numbered searches in the search box. Click Search.
How do I get articles I find in PubMed?

The yellow button is attached to each record in PubMed when looking at the abstract view of a record. Click on Display Settings and select Abstract and Apply. Your list of results will now be in the abstract view.

When you click on the yellow button you get a menu of access options for the article. Options that may be available when you click on the button include:

- Links to the full text of an article
- Automatic catalogue searching for print holdings of journals
- Document delivery request forms to request items not available electronically or in print

If an article is available in electronic form, a simple click will take you to the full text of that article. Sometimes the article will not be available online. In that case a link will search the Library’s online catalogue for a print holding of the journal which you can borrow or photocopy. Finally, if the article is available in neither electronic nor print form, you can request that a copy of the article be sent to the library of your choice using the Document Delivery option.

Lisa Demczuk, Librarian
Victoria General Hospital
Nursing Ethics Webliography

The following is a selected list of resources available from the UM Libraries on the topic of Nursing Ethics. Each book title is linked to the Library’s catalogue where you may “place a request” for a title of interest. The articles are available online or can be requested from any UM library using the UM Links button. Links to online resources are also provided.

More webliographies can be found on the Health Sciences Libraries Webliographies web page. Webliographies can be used by practicing nurses for continuing education and professional development purposes. Nursing students and other health professionals may find them useful as a starting point for research on a particular topic.

Sherri Vokey is the New HSC Librarian

Sherri Vokey is the new Health Sciences Centre Librarian at the Neil John Maclean Health Sciences Library, and an Assistant Librarian with the University of Manitoba. Before moving to her current position at the Neil John Maclean Health Sciences Library, she held positions as an academic librarian at the University of Winnipeg, University of Nevada, Las Vegas, and the University of Toronto. Sherri was the lead instructor in the Library & Information Technology Program at Red River College from 2007-2010. She graduated from the University of Western Ontario with a Master of Library and Information Science in 2002, and a Master of Arts from Queen's University in 2000.

As the Health Sciences Centre Librarian, Sherri acts as a liaison between the library and researchers, clinical practitioners, health care administrators and teachers and students in nursing and selected allied health programs at the HSC. She provides reference services, literature searches, collection development, and orientation and education programs for library services.

Sherri Vokey, Librarian
Health Science Centre

Analyn Baker at the Seven Oaks General Hospital Library is retiring!

Analyn Cohen Baker began her career as a nurse, graduating from the Winnipeg General Hospital School of Nursing. After many years of nursing service, Analyn went back to school to receive a Library Technician Diploma from Red River Community College. Always moving forward Analyn completed a Master of Library Science degree from Emporia University in 1996. Well suited for a hospital library, Analyn, successfully combined her nursing knowledge with her library expertise at the Seven Oaks General Hospital Library beginning in 1998. She played a vital role in the consolidation of Winnipeg's hospital libraries into the Health Sciences Libraries of the University of Manitoba and became Section Head of the Seven Oaks General Hospital in 2002.

Analyn provided innovative library services working directly with the SOGH clinical and administrative staff, offering reference, training and literature search services. She also provided library support to employees of the Winnipeg Regional Health Authority in the Seven Oaks and Inkster community offices. Analyn made great strides in building the SOGH Library's collection to reflect the hospital's clinical programs. She advanced the librarian's role in evidence based practice by participating in clinical Family Medicine Rounds, and was instrumental in organizing the hospital librarians to meet the needs of the WRHA Nursing Leadership Framework project.

She received the University of Manitoba Outreach Award for her role in enlarging and enriching the contacts of the University of Manitoba with the Seven Oaks General Hospital and the Winnipeg Regional Health Authority. Her contributions to numerous committees, at the hospital, the University of Manitoba Libraries, and professional affiliations have been abundant including the Canadian Health Libraries Association Conference Planning Team for 2009. Analyn has made important contributions professionally and personally, countless people have been the recipients of her expertise with literature searching, database training and reference skills. Colleagues have had the benefit of wise consul, mentorship, encouragement and support. She will be sorely missed by her colleagues and by the staff of Seven Oaks.

As of May 3, 2010, Janet Rothney will be the acting Seven Oaks General Hospital Library.

Christine Shaw-Daigle, Librarian
St. Boniface Hospital
Books on Nursing Ethics

Location: St. Boniface General Hospital Library; Seven Oaks General Hospital Library
Call Number: WY 85 O12e 2009

Developed from the ground-up in Canada, Ethics in Canadian Nursing Practice provides a balanced combination of nursing ethics theory, application, and legal content to readers. By incorporating the 2008 edition of the Canadian Nurses Association's Code of Ethics, this engaging text makes a direct and meaningful connection between the presented curriculum and national guidelines, making it an indispensable resource for students and practitioners.

Location: Concordia Hospital Library; Grace General Hospital Library; Misericordia Health Centre Library; NJM Health Sciences Library
Call Number: WY 85 K25e3 2010

Understanding the inherent ethical and legal complexities involved in health care is a key aspect of nursing practice. Ethical & Legal Issues in Canadian Nursing, 3rd ed., explores the changing roles of today’s nurses and the complex challenges they face, including the rights and responsibilities of patients and caregivers, advancements in technology, and collaboration with clients, families and the health care team. An invaluable resource for Canadian nurses whether students or practitioners as it prepares them for the moral and legal challenges they will face in practice.

Angela Osterreicher, Librarian
J.W. Crane Memorial Library
Video on Nursing Ethics

**Professional ethics for nurses and social workers**, Carrollton, Texas : PRIMEDIA Workplace Learning, distributed by Medical Audio Visual Communications, Inc., c2001. VHS 30 min

Location: Grace General Hospital Library  
Call Number: WY 85 P964p 2001 AV

With the ongoing advances in medical science the issues facing healthcare providers have become more complex. This program's presenter identifies the current issues and trends in health care ethics as well as the role of nurses and social workers as part of the healthcare team. In addition, the professional ethics of both social workers and nurses are highlighted. Steps for resolution of ethical dilemmas are also discussed.

Angela Osterreicher, Librarian  
J.W. Crane Memorial Library

Provincial Health Ethics Network

"The Provincial Health Ethics Network (PHEN) of Alberta is a non-profit organization which provides resources on addressing ethical issues related to health. PHEN does not advocate for or take positions on particular ethical issues; its role is to facilitate thoughtful, informed and reasoned ethical decision-making from all perspectives."

This site provides a variety of resources including:

- **New Resource to Assist With Making Difficult Health Care Decisions** – A new resource, Comfort, Hopes and Wishes: Making Difficult Health Care Decisions is a booklet developed to assist with end-of-life decisions. A draft copy may be downloaded.
- **New Adult Guardianship and Trusteeship Act** - Information on this Act is provided to meet users' needs. This section is divided into sections, such as frequently asked questions, to better enable users to find the information they are searching for.
- **New Mental Health Amendment Act** – Information on the Act is provided in order to keep users current on changes that have occurred.
- **Review of Alberta Health Services Draft Code of Conduct** – Summary reports of discussions by professionals regarding the Code of Conduct policy. These discussions are hosted by the Provincial Health Ethics Network as part of their mandate to encourage discussion on health issues.

Other features include resource materials, an e-store, resources including articles and accreditation, professional development, videos and news items.

For Your Patient: Celiac Disease

According to Health Canada’s report Celiac Disease: the gluten connection as many as 300 000 Canadian could have this disease. However, findings in a recent study published in Pediatrics are likely to increase this number due to serological testing. Recent developments in the diagnosis of celiac disease are important as celiac disease has been difficult to diagnosis. Celiac disease (CD) is a multisymptom, multisystem disorder with a wide spectrum of severity and can present at any age. For this reason, CD is the most under-diagnosed common autoimmune disorder in North America and described as “hidden and dangerous”.

The Canadian Celiac Association 2010 National Conference will be held in Winnipeg, Manitoba, June 4-6, 2010.

Below is a list of Consumer Health books and online resources for patients and/or caregivers who have an interest in celiac disease. A free Consumer Health Borrower’s Card, available to all Manitobans, allows material from the Consumer Health Collection to be borrowed for two weeks.

Spotlight on Services: House Calls

WHAT IS A HOUSE CALL?
The University of Manitoba Health Sciences Libraries provides personalized training sessions on a variety of topics relating to library resources.

House calls are great for when you want more in-depth training on a particular resource, or just need a quick refresher. The sessions can also be used to help improve your ability to search and access materials. These smaller sessions are also a good choice when there is no group training scheduled.

Possible topics:

- Search strategies for a large research project
- Choosing the best resources for your subject (databases, journals, web resources)
- Current awareness strategies such as Table of Contents alerts or subject alerts, RSS feeds
- Citation management programs; RefWorks, Reference Manager, EndNote
- Using library resources such as the website, catalogue and ordering documents
- Search techniques for PubMed, CINAHL, Cochrane Library or other databases offered through the University of Manitoba Health Sciences Libraries

Whenever it is, whatever the topic, a house call is always targeted to your specific needs, and takes your daily work into account.

WHERE DOES A HOUSE CALL TAKE PLACE?
Just like a doctor’s house call, we come to you – meetings can be arranged for your office, lab, or departmental meeting. If you prefer, we also provide house calls in the library.

WHO CAN REQUEST A HOUSE CALL?

- Hospital staff and residents
- WRHA employees
- UM faculty and staff employed through the Bannatyne Campus
- UM graduate students studying through the Bannatyne Campus

Individuals and small groups are welcome to use this service.

HOW DO I BOOK A HOUSE CALL?
To schedule a personalized training session, simply fill out the online form available on our website. A librarian will then contact you to discuss your request and confirm a convenient time. You may also contact your local health sciences library directly.

Don’t delay - Book your house call today!

Janet Rothney, Acting Librarian
Seven Oaks General Hospital Library
